RAIL INDUSTRY SAFETY AND STANDARDS BOARD

CODE OF PRACTICE

Rail Safety Investigation

Australian
STANDARD

COP RSI PREVIEW ONLY

Notice to users

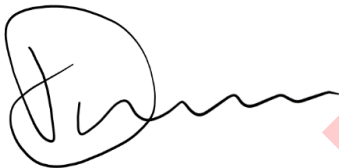

This RISSB product has been developed using input from rail experts from across the rail industry and represents good practice for the industry. The reliance upon or manner of use of this RISSB product is the sole responsibility of the user who is to assess whether it meets their organisation's operational environment and risk profile.

ATSB, TfNSW, PTA WA, CQU, V/Line, RTBU, Downer, DT Infrastructure, MTM, ARTC, CERT, Rail Operations and Safety Consulting, World Bank, CPB Contractors, SCT Logistics, ATHRA, RATP Dev Australia, Bradken, BHP, Aurizon, TP Advisory.

The Operations Standing Committee verified that RISSB's accredited process was followed in developing the product, before the RISSB Board approved the document for publication.

RISSB wishes to acknowledge the positive contribution of subject matter experts in the development of this Standard. Their efforts ranged from membership of the Development Group through to individuals providing comments on a draft of the Standard during the open review.

I commend this Code of Practice to the Australasian rail industry as it represents industry good practice and has been developed through a rigorous process.

Damien White
Chief Executive Officer
Rail Industry Safety and Standards Board

Keeping RISSB products up-to-date

Products developed by RISSB are living documents that reflect progress in science, technology and systems. To maintain their currency, RISSB products are periodically reviewed, and new editions published when required. Between editions, amendments may be issued. Products developed by RISSB could also be withdrawn.

It is important that readers assure themselves that the RISSB product they are using is current, including any amendments that have been issued since the product was published. Information about RISSB products, including amendments, can be found by visiting www.rissb.com.au.

RISSB welcomes suggestions for improvements and asks readers to notify us immediately of any apparent inaccuracies or ambiguities. Members are encouraged to use the change request feature of the RISSB website at: <http://www.rissb.com.au/products/>. Otherwise, please contact us via email at info@rissb.com.au or write to Rail Industry Safety and Standards Board, PO Box 518 Spring Hill Qld 4004, Australia.

Objective

This Rail Safety Investigation Code of Practice has been produced to define industry good practice for anyone in the Australian rail industry who is involved in, or likely to be involved in, the investigation of rail safety occurrences. It also provides guidance in the application of the Code and a suite of tools to assist investigators.

The aim of the Code is to establish a methodical approach to the collection and analysis of investigation data so that system improvements necessary to prevent or reduce the likelihood of recurrence can be identified and implemented.

The Code provides a simple, standard method of investigation and builds on the best practices already used by various organizations in the industry whilst promoting a just culture approach for all investigations.

Table of Contents

Section 1	Introduction.....	9
1.1	Preface	9
1.2	Scope	9
1.3	Referenced documents	9
1.4	Defined terms and abbreviations.....	10
Section 2	Legal requirements	11
2.1	Office of the National Rail Safety Regulator	11
2.1.1	Risk management requirements under the RSNL.....	11
2.1.2	Notifiable occurrences	12
2.2	Australian Transport Safety Bureau	12
2.3	Office of the Chief Investigator – Transport Safety (OCI Victoria)	12
2.4	Office of Transport Safety Investigations – (OTSI New South Wales).....	12
Section 3	Rail safety investigations.....	13
3.1	Purpose of a rail safety investigation	13
3.2	Rail safety investigation principles.....	13
3.3	Risk management.....	14
3.4	Management commitment and support	15
3.5	Applying a systems approach.....	16
Section 4	Safety culture.....	17
4.1	Importance of a positive safety culture	17
4.2	Just culture	17
4.3	Organizational learning	18
Section 5	Investigations framework.....	19
5.1	Rail safety investigations.....	19
5.2	Immediate actions upon occurrence notification	19
5.2.1	Overview	19
5.2.2	Determining the level of the investigation.	19
5.2.3	Appointing an investigation team.....	19
Section 6	Measuring the severity.....	20
6.1	Assessing the severity of the occurrence.....	20
6.2	Identifying the level of an investigation.....	20
6.3	Investigation levels.....	22
6.3.1	Complex investigation (Level 1)	22
6.3.2	Investigations requiring a team (Levels 2 & 3).....	22
6.3.3	Low level investigations (Level 4 & 5)	22
6.4	Investigation level based on RSNL occurrence categories	22
Section 7	Planning the investigation.....	23
7.1	Initiating the investigation	23
7.1.1	Overview	23

7.1.2	Developing an investigation plan	23
7.1.3	Responsible authorities.....	24
7.1.4	Managing the media	24
7.1.5	Confirmation of the investigation level and effort	24
7.2	Investigation resources	24
7.2.1	Appointment of resources	24
7.2.2	Attributes and skills for investigators.....	24
7.2.3	Independence of the investigator	25
7.2.4	Subject matter experts.....	25
7.2.5	Lead investigator	26
7.2.6	Investigation team responsibilities	26
7.2.7	External agencies	27
7.2.8	Investigation communiqué and updates	27
Section 8	Collection of evidence	28
8.1	Evidence	28
8.1.1	Identifying sources of evidence	28
8.1.2	Physical evidence	28
8.1.3	Documented evidence	28
8.1.4	Photography.....	29
8.1.5	Site evidence	29
8.1.6	Witnesses	30
8.2	Interviews.....	30
8.2.1	Interviewing techniques.....	30
8.2.2	Location and setting of the interview	30
8.2.3	Support person.....	31
8.2.4	Planning the interview	31
8.2.5	Obtaining details about the interviewee	31
8.2.6	Starting the interview.....	31
8.2.7	Asking questions	32
8.2.8	Ending the Interview	32
8.2.9	Following up and verifying interview records.....	33
Section 9	Types of evidence	34
9.1	Evidence categories.....	34
9.1.1	Perishable evidence	34
9.1.2	Retrievable evidence.....	35
9.1.3	Available evidence.....	35
9.2	Principal methods of recording evidence	35
9.3	Chain of evidence	36
9.4	Management of site evidence.....	36
9.4.1	Overview	36
9.4.2	Concluding data gathering and releasing the site.....	37
Section 10	Types of findings	39

10.1	Contributing factors	39
10.2	Other factors resulting in increased risk	39
10.2.1	Failure modes	39
10.2.2	Special Control Procedures	39
Section 11	Investigation reports	40
11.1	Purpose of rail safety investigation report.....	40
11.1.1	Overview	40
11.1.2	Investigation report templates	40
11.1.3	What to include in the investigation report.....	41
11.1.4	Interim or preliminary reports	41
11.1.5	Lessons learnt.....	41
Section 12	Monitor and review process	42
12.1	Reviewing the investigation report.....	42
12.1.1	Overview	42
12.1.2	Dissention.....	42
12.2	Safety actions	42
12.2.1	Setting safety actions	42
12.2.2	Monitoring and close out of safety actions	43
12.2.3	Implementing safety actions.....	43
12.3	Signing off the report	43
12.3.1	Handover.....	43
12.3.2	Distributing and presenting a report	43
12.3.3	Archiving the report	44
12.4	Review of the investigation process	44
12.4.1	Investigation review committees.....	44
12.4.2	Industry safety notices	46
Appendix A	Investigator Skill Sets	47
A.1.1	Key attributes for an investigator	47
A.1.2	Training & Assessment.....	47

Section 1 Introduction

1.1 Preface

This Code of Practice (CoP) acknowledges a range of investigation models or frameworks that could be adopted to investigate occurrences within the rail industry.

The investigation methodology contained within this Code establishes the minimum rail safety investigation practices. Other frameworks may be used, provided they meet the intent of the principles outlined in this Code.

This Code provides the basis of a common approach to investigation of occurrences for the Australian rail industry that accommodates individually tailored, systemic investigation methods that rail transport operators (RTOs) may use.

Throughout this document, the term occurrence will refer to safety incidents that are notifiable under Rail Safety National Law (RSNL) or any other investigation that an RTO undertakes to determine any contributing factors and identify safety risk mitigations and preventative actions.

1.2 Scope

This Code provides procedures, tools and examples to assist rail transport operators (RTOs), organisations, and anyone responsible for conducting a rail safety investigation. This Code is not intended to be used for investigations of a disciplinary and regulatory prosecution.

Specifically, this Code is designed to help:

- (a) compliance with the intent of the provisions and principles of the Safety Management System and prevailing rail safety standards;
- (b) response in a structured, systematic and consistent manner to rail safety occurrences;
- (c) identification of all contributing factors to the incident and development of safety actions to address these contributing factors;
- (d) identification of any and all factors contributing to the incident, and the development of safety actions to address those contributing factors; and
- (e) systemic contributors to the occurrences using investigative tools and methods.

This Code is primarily designed for the investigation of rail safety occurrences. However, the principles and practices are equally applicable to any other investigations as deemed appropriate by the RTO.

1.3 Referenced documents

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document:
